SHEIKH AFAQ

CSE Student

A Computer Science and Engineering graduate with problem-solving skills looking for an entry-level position to kickstart a career as a Software Engineer through commitment, perseverance and continuous improvement. I wish to work in a dynamic organization that will contribute to my professional and personal growth while I pitch in with my expertise for the growth of the organization as well as engage in opportunities to further the organization's goals.

Matriculation
Scholars' School, Srinagar

03/2015 - 03/2016   *CGPA: 8/10*

PROJECTS

Healthcare Management System
- The purpose of the project is to computerize the Front Office Management of Hospital to develop software that is user-friendly simple, fast, and cost-effective. It deals with the collection of patient's information, diagnosis details, etc.

Online Voting System
- Online Voting is a web-based voting system that helps manage elections easily and securely. This voting system can be used for casting votes during the elections held in colleges, etc. In this system, the voters do not have to go to the polling booth to cast their vote. They can use their personal computer to cast their votes. Looking Forward to using BlockChain tech to make it more secure.

Simon Game
- The Simon game is the exciting electronic game of lights and sounds in which players must repeat random sequences of lights by pressing the colored pads in the correct order. It's fast-paced play, with lights and sounds that can challenge you. Experience the fun as you repeat the patterns and advance to higher levels.
